

Appendix IV

Transcript of the Follow-Up Interview with Mr. X

Me: Hey Mr. X, thanks for chatting with me today. I wanted to get your thoughts on the final version of the online menu program.

Mr. X: No problem. Let's check it out.

Me: Okay, so first of all, I made the menu responsive using the Bootstrap framework like you asked. That means it'll adjust to fit any device, whether it's a phone, tablet, or computer.

Mr. X: Looks good to me. The menu is easy to use and the layout looks professional.

Me: I'm glad you like it. I also made sure to include the option to categorize menu items and add pictures, like you wanted. And I created a program with a GUI that lets you easily edit and update the menu.

Mr. X: This is exactly what I was hoping for. The GUI is user-friendly and being able to make changes quickly is super convenient.

Me: I'm glad you think so. And I included security measures like encryption and access controls to protect your menu data.

Mr. X: Awesome. I really appreciate your attention to detail.

Me: No problem, Mr. X. I'm glad I could help you improve your online menu and make it more user-friendly for your customers. Do you have any other suggestions or ideas for the program?

Mr. X: Actually, I was thinking about adding a feature that allows customers to place orders directly through the menu. Do you think you could add that in?

Me: Definitely. I can work on adding that feature for you on a future implementation. Is there anything else you'd like to include?

Mr. X: Not that I can think of right now. Thanks for all your hard work on this project. I'm really happy with how it turned out.

Me: No problem, Mr. X. I'm glad I could help. If you have any other needs or questions, just let me know.

Mr. X: Will do. Thanks again.
